SANITY SOLUTIONS BOOSTS TECH PARTNER LIST

Riverbed becomes the latest technology partner to join with Sanity Solutions

DENVER, COLO. (March 14, 2008) – Sanity Solutions, a provider of comprehensive storage equipment and services based in Denver, Colo., recently added Riverbed to its list of technology partners, further strengthening their brand promise to create distinctive value for their clients by providing a legendary customer experience.

Jason Cherveney, chief executive officer of Sanity Solutions, explains, “Riverbed allows us to provide faster and safer remote site backups to our clients, saving them a lot of time and money.” Overall costs are reduced because it allows Sanity clients to eliminate costly reoccurring monthly telephone expenses.

The Sanity relationship with Riverbed will also allow Sanity customers the benefit of running applications from a central location more efficiently, while using applications in remote offices. In many cases, organizations are limited to where they run their applications due to the latency of their wide area network (WAN). Now businesses have a way to let organizations run their applications from a central site, making management of backup and recovery a lot easier.

About Sanity Solutions, Inc.

Founded in 2004, Sanity Solutions is a storage solutions provider that creates distinctive value for every customer. Complete solutions that eliminate data loss, increase data availability, and lower overall costs are determined based on customer needs. As a market leader, Sanity partners with the industry’s foremost storage and data management companies to offer customers the most advanced products as part of a comprehensive storage solution.
